

## **Applications Engineer, RF, Microwave, and Photonics Modeling**

COMSOL, Inc. in Burlington, MA, is seeking an Applications Engineer to join our growing team. In this position you will be entrusted with a broad range of responsibilities, allowing for your personal growth and upward movement within the company. Our office serves the Eastern United States and Canada.

### **Primary Responsibilities:**

- Provide technical support for COMSOL Multiphysics and the RF Module
- Give product demonstrations at seminars, workshops, conferences, and meetings with customers
- Act as instructor at product training sessions
- Working collaboratively with development engineers and participate in product development for RF, microwave, and photonics applications

### **Qualities:**

- Business oriented
- Genuine interest of mathematical modeling, computational physics, and related software modeling tools, particularly within the field of electromagnetic waves
- Strong attention to customer service
- Strong written and verbal communication skills
- High energy, self-motivated, quick study with positive attitude, flexible nature and goal-oriented work habits

### **Requirements:**

- M.S or Ph.D. in engineering or physical sciences
- Experience in mathematical modeling
- Eligibility for work in the US

Preference will be given to applicants with COMSOL Multiphysics experience and a solid background in Applied Mathematics.
